## Introduction

Introducing U.S. PARMA and Victory Soccer Academy LLC, a professional alliance dedicated in providing the youth of New Jersey with superior soccer instruction. The ranges of students that currently participate within this alliance start as early as Pre-K and continue up to U-23. Our goal is to help each player develop his/her individual skills, integrate their individual skills to relate to team play, and make progress towards mastering the game. We guarantee a high quality learning experience for players of all ages and experience levels. In addition, we pride ourselves on creating a learning environment conducive to maximum improvement and development. Basic skills, technical training, tactical training, and physical training are the primary areas covered at every training session.

## Camp Philosophy

Positional training camp is an instructional camp that is designed to help children develop an overall understanding, awareness and skill ability in a desired position. Children will be able to develop their skills through specific positional training techniques and drills that will give them the ability to succeed at their maximal potential in their desired position.

Victory Soccer Academy has developed their students with an effective and structured curriculum that provides children with the attention that is needed to develop. With these 3 effective principals, VSA has developed some of the top players in their respective counties.

1. Demonstrations of proper skill techniques.
2. Variety of drills design specifically to develop positional techniques.
3. Providing knowledge and awareness of what specifically positional player should be doing during the game.

These 3 principals are designed to enforce and reinforce newly learned skills, which will also help children develop an understanding of their desired position.
